

# Maths Mastery Home Learning Challenge

## Adult Guidance

### What Are We Learning?

We are learning about numbers to 5.

### How to Set up the Challenge

- This activity can be played indoors or outside, using everyday objects all around you.

### How to Get Your Child Thinking

- How many do you have?
- How can you check? Can you show me?
- I think you have four leaves. Do you agree? Why/why not?
- How can you arrange your objects? Can you arrange them in a different way? Is there still the same number?

## Numbers to 5 Scavenger Hunt

- Your grown-up will think of an object and a number to 5.
- Can you run and find this number of objects, such as 'Find 5 pink things' or 'Find 3 green leaves'?
- How many did you find?
- Can you check by counting?
- Can you arrange your objects in a different way? Is there still the same number?
