

Name Scumbling!

Write your name in large chunky letters (at least 1 finger width thick) across the page. Create a single, long line that wanders all over the page, which loops and has lots of changes in direction. Make sure it crosses your name to split it up into sections.

Now colour in just the parts inside your letters. You could use different shades of each colour like the example below or do it however you like. You could even add patterns like in your 3, 4, 5 or 6's!

Other ideas you could go for.
