

Game Creator – Week 1

Your tasks this week are:

- **Test the seven Showcase Games on the 2DIY 3D page.**
- **Write two reviews using the blank Computer Game Review in your 2Dos. (You will need to write one review, save it and then open the 2do again to create your second review.)**
- **Start to plan your own game, bearing in mind what you have learned from reviewing the Showcase Games, using the blank Computer Game Planner in your 2Dos.**

1. This half of term we are going to use Purple Mash's 2DIY 3D app to create a maze and then turn it into a 3D computer game. The aim is to avoid the 'baddies' and collect 'treasure'.
2. Open the 2DIY 3D program, which can be found by going to the Tools section of Purple Mash and then the Quiz and Game Creation section on the right-hand side.

3. Click on the icon

4. This will take you to the 2DIY 3D page. Scroll down the page to find the Showcase games section.
5. Try all the games and choose the one you like the most and then the one you like the least.
6. Write a review of each of your choices using the Computer Game Planner in your 2Dos. **REMEMBER to save your reviews in your My Work folder using meaningful file names.**
7. Start to plan your own game which we will be working on next week by using the Computer Game Planner in your 2Dos. (You can expand this planner by clicking on the purple arrows at the bottom of the pages and you can turn it over by using the big green arrow at the bottom.) You may not want to fill in all the sections but you must fill in the sections you can and you will continue to add to this planner as you make your own game.

Next week you will start to make your own game.
