Cardboard Tube Tiger

You will need:

- Small cardboard tube
- Orange pipe cleaner
- Tiger template
- Orange and black paint
- Paintbrush
- Coloured pencils or felt-tip pens
- Black felt-tip pen
- PVA glue
- Scissors
- Sticky tape
- Googly eyes (optional)

Step 1

First, paint the cardboard tube orange and allow to dry.

Step 2

Now take the tiger templates; you will need two sets of legs and a head. You can either use the pre-coloured ones or colour in your own using coloured pencils or felt-tip pens. Then draw a face onto the tiger's head using the black felt-tip pen. You could also stick some googly eyes on if you have them.

Step 3

Next, carefully cut out the tiger templates. This can be a little tricky, so you may need an adult to help you. Make sure you don't cut off the tabs!

Step 4

Once the orange tube is dry, draw or paint some black stripes all around it.

Step 5

Now, fold over the tabs on the head and leg templates.

Step 6

Next, carefully cut two slots into the underside of the tube, near each end, you may need an adult to help you.

Step 7

Carefully push the leg tabs through the slots and fold the tabs over. Secure with a little sticky tape.

Step 8   Next, put a little tape onto the head tab and fix inside one end of the tube.

Step 9

Finally, cut a piece of pipe cleaner to be your tiger's tail. Fix the tail inside the other end of the tube using a little sticky tape.
